

PRODUCT DATA SHEET

PROTECTAGLOSS

(TYRE & VINYL SHINE)

DESCRIPTION

Protectagloss is a high quality solvent-based silicone tyre treatment. It is formulated with silicones that provide a consistent shiny finish when applied correctly.

It resists water and outlasts most competitive products. Protectagloss also rejuvenates tyres and aged vinyl.

APPLICATION

Protectagloss may be sprayed, painted or wiped onto surfaces. Spraying the surface evenly and allowing 15 minutes to dry obtains best results. Should faster drying be necessary, wiping with a clean rag after spraying will help, however, a less shiny surface may result.

This product is highly flammable and should be treated accordingly. The product MSDS should be read before using.

CONTAINER SIZES

200 Litres, 20 Litres, 4 Litres
