

PRODUCT INFORMATION SHEET

Product Name: TALCOR COMPLEX BG GREASE

Date Issued: 19th March, 2007

PRODUCT

Talcor Complex BG is a synthetic fortified premium high temperature grease for very heavy duty automotive, transport, industrial and agricultural applications. Its advanced additive package includes polymers to resist wash-out, pound-out and splatter. It has a complex thickener which allows short period operating temperatures up to 235°C. It is translucent blue/green in colour.

APPLICATION

Developed for general plant lubrication and ball and roller bearings where elevated temperatures are a factor. It is the upgrade recommendation for extreme duty, high load wheel bearing applications.

STANDARDS

Meets or exceeds the following:
NLGI: 2

CONTAINER SIZES

20 kg. 2.5 kg, 500 g, 450 g cartridges.
