

PRODUCT DATA SHEET

ADBLUE®

A background image showing a close-up of a diesel engine's internal components, including various valves, pistons, and a yellow fuel rail, all rendered in a semi-transparent, light blue and white color scheme.

DESCRIPTION

AdBlue® is an aqueous urea solution for use as a Diesel Exhaust Fluid (DEF). It is used in the Selective Catalytic Reduction (SCR) systems fitted to diesel vehicles in compliance with exhaust emission standards reducing oxides of nitrogen from exhaust gases. AdBlue® contains high purity urea in a clear demineralised water, is non-toxic and safe to handle.

APPLICATION

Used in vehicles fitted with an SCR (Selective Catalytic Reduction) system for management of oxides of nitrogen in exhaust emissions. This product is added to the tank fitted to the vehicles.

Use as per manufacturers recommendations.

CONTAINER SIZES

1000 Litres, 205 Litres, 10 Litres

Issue Date 1/9/2019

Proven Protection. Powerful Performance.
