

**PRODUCT DATA SHEET****HAND SANITISER****DESCRIPTION**

Prolube Hand Sanitiser is an hospital grade alcohol based sanitiser for removing infection agents and disinfecting hands without the need for washing with soap and water. This blue gel is used without water so permits cleansing between tasks and when water washing is not an option. It has a non-greasy formula which should not cause irritation to the skin with frequent use. The sanitiser is effective at killing 99.9% of germs and bacteria.

**APPLICATION**

Apply a small quantity (1 – 2 ml) to hands and rub vigorously until all the product has evaporated. It is recommended to use as an alternative to washing effectively with soap and water.
