

## PRODUCT DATA SHEET

# SPRAY ON FLUID

## DESCRIPTION

Spray on Fluid is a combination of vegetable and paraffinic base stocks blended with non-foaming release agents that will not emulsify with water. This product is a cost-effective alternative to using diesel and is also a more environmentally friendly product than diesel.

## APPLICATION

Spray on Fluid is ideal for applying to surfaces that come in contact with concrete. The protective layer creates a barrier to prevent adhesion of concrete to the surface and protects painted surfaces from premature loss of colour.

Apply with a spray or brush to obtain an even coating.

Breathing apparatus should be used when applying by spray method. Please refer to the Safety Data Sheet for detailed information regarding use.

## CONTAINER SIZES

205 Litres, 20 Litres

Issue Date 31/3/2020
