

## PRODUCT DATA SHEET

# FORM OIL PREMIX

## DESCRIPTION

Form Oil Premix is a general purpose, hydrocarbon, concrete release agent which can be used on all types of both timber and metal formwork to prevent adhesion of the concrete. Prolube Form Oil provides excellent form adhesion with clean surface release. Prolube Form Oil contains an organic fatty acid which forms a soap type film when in contact with the wet concrete, creating a clean bond break.

### **Benefits**

- Non-staining
- Smooth finish
- Minimal air/bug holes
- Economical
- Easy application
- Protects moulds from rust, increasing form life.

Viscosity: (Typical) 3.4 cSt@40°C

## APPLICATION

Form Oil Premix is ready to use undiluted.  
Apply with a spray, brush or roller to obtain an even coating.

### **Typical Coverage**

Timber up to 20 square metres per litre  
Metal up to 35 square metres per litre  
Coverage rate depends on form condition.

## CONTAINER SIZES

1000 Litres IBC, 205 Litres, 20 Litres

Issue Date 1/9/2020

*Proven Protection. Powerful Performance.*
