

## PRODUCT DATA SHEET

# **SYNTEGRA C5 0W20**

## **(FULL SYNTHETIC ENGINE OIL MID SAPS)**

### DESCRIPTION

Syntegra C5 0W20 is an ultra high performance, fully synthetic motor oil using the latest mid “SAPS” technology to provide optimum performance in current model petrol and diesel engines requiring low emission exhaust aftertreatment. It is suitable for naturally aspirated and turbocharged motors. The very low viscosity at high temperatures contributes to the fuel economy performance.

This product is designed for the latest model engines which require the use of very low viscosity multigrade oil. Its high performance, balanced additive formulation ensures cleaner running from superior deposit control and wear protection from the corrosion inhibitors and anti-oxidation chemistry.

Viscosity Typical 7.2 cSt @ 100°C

### APPLICATION

Syntegra C5 0W20 is designed for late model 4 stroke petrol engines, particularly multi-valve, multi-cam models requiring a very low viscosity oil for fuel economy, low emissions and high performance. It is also ideal for modern car and SUV diesel engines. This ACEA C5 0W20 product is most commonly specified in engines post 2016. Suitable for passenger vehicles fitted with Diesel Particulate Filters (DPF).

### STANDARDS

Meets or exceeds the following:

SAE Grade: 0W20

ACEA: C5-21 (2021)

API SP

### CONTAINER SIZES

1000 Litres IBC, 205 Litres, 20 Litres

Issue Date 12/1/23
